

Newsletter Mrs. Hildebrandt- April

Where did March go? It went by so fast. Before you know it summer will be here.

You should have alphabet pages Aa-Rr at this point. If you don't...let me know and I will fill in the missing pages.

Please remember to bring jackets each day and children should wear shoes that are safe on the playground. Flip-Flops are really not a safe choice for running and climbing. Thanks.

If you have any photos you could share for our memory books...I need them NOW. Do you sense some urgency??? Yes. They take a tremendous amount of time to put together and I need all photos A.S.A.P. to finish up. If you would be willing to glue photos on pages or help design a few pages....let me know. We could have a gluing party. Ha

This month....

Units: Easter, Exploring the Arts, Spring

Letters: Rr, Uu, Vv and Ww.

Color: Yellow

Numbers: 9, 10

Shape: Oval, Square.

The Science Lady will present a lesson on the life cycle of a lady bug. Teachers will add the life cycle of a butterfly when our butterfly larvae arrive this month.

Art projects will be framed and displayed for our Art Show beginning April 23rd. That is also the night of our spaghetti dinner fund raiser and fantastic show "Top Hogs". You don't want to miss this show. The pigs have been on Jay Leno and are something to behold.

We will be concentrating on alphabet recognition and the sound each letter makes as we do our final push for kindergarten readiness. Please keep up the alphabet books reading at home and make learning the alphabet fun. For those who really have a handle on that already, the library is full of beginning readers and librarians will help you select some that will be fun. Barnes and Noble also have a good selection and try Starfall.com for fun activities with the alphabet. Mrs. H.
